Artificial Intelligence: Heuristic Search & A* Algorithm

Lecture slides & step-by-step 8-puzzle problem walkthrough

Author: Vikram Singh (MCA) | ShelfShare Academic Resource

---

1. State Space Search formulation: Initial State, Actions, Goal Test, Path Cost.
2. Uninformed Search: BFS, DFS, Uniform Cost Search, Iterative Deepening.
3. Informed Search: Best-First Search and Heuristic Functions.
4. A* Search: fn = gn + hn, Admissibility and Consistency of Heuristics.
5. Adversarial Search: Minimax algorithm and Alpha-Beta Pruning.
6. Knowledge Representation: First-Order Logic and Resolution theorem proving.
