Cloud Computing: Cloud Models & Architecture Notes

IaaS, PaaS, SaaS, AWS core services and virtualization concepts

Author: Rahul Sen (MCA) | ShelfShare Academic Resource

---

1. Definition of Cloud Computing NIST Model and Essential Characteristics.
2. Service Models: IaaS EC2, PaaS Elastic Beanstalk, SaaS Google Workspace.
3. Deployment Models: Public, Private, Hybrid, Community Cloud.
4. Virtualization: Hypervisor Type-1 Bare Metal vs Type-2 Hosted.
5. Containerization: Docker vs Virtual Machines, Kubernetes orchestration.
6. Cloud Security: Shared Responsibility Model and Identity & Access Management IAM.
